DARDA DEMONS—

An exciting adventure into the world of self-propelled model car action!

Designed and engineered to the highest quality standards, DARDA DEMONS feature the unique DARDA MEGA MOTOR™ which propels the cars to speeds of over 520 mph [scale] with a travel range of up to 78 linear feet. Simply push the car both forward and backward and the powerful DEMON winds itself. DARDA MEGA MOTORS™ are replaceable, too.

DARDA DEMONS' quality doesn't stop there. Each interchangeable zinc alloy body is colorfully painted to the finest detail [decals are never used], has a rear shock absorber effect, and feature white lettered side wall tires.
